

**Client:** Lyons Nebraska, Municipal City Power  
**Application:** Power Generation  
**Project Total:** N/A

**Description:**

PMSI has had a long-standing relationship in the power market with certification on all types of engine systems. The Lyons Nebraska project has encompassed the rebuilding and maintenance of their 3.2-megawatt facility. The most recent projects with them are nearing completion of re-certification and "0" hour rebuild of their Enterprise and Superior engine facility. The city benefits from peaking power backup capability, and sales of power to Nebraska Public Power from this facility. PMSI has featured unique savings in their maintenance and service of this facility through years of experience on the older type equipment they are currently running.

**Engine-Generator Specifications:**

**Enterprise R-2, I-8 (Single)**

|              |                  |
|--------------|------------------|
| <b>Fuel:</b> | <b>Dual Fuel</b> |
| <b>BHP:</b>  | <b>1800</b>      |
| <b>kW</b>    | <b>1200</b>      |

**Superior 600-800 kW (Two Units)**

|              |                    |
|--------------|--------------------|
| <b>Fuel:</b> | <b>Dual Fuel</b>   |
| <b>BHP:</b>  | <b>750 and 650</b> |
| <b>kW</b>    | <b>800</b>         |
