

Client: Raytheon, Andros Island, The Bahamas
Application: Power Generation
Project Total: \$300,000

Description:

Raytheon operates a power plant on Andros Island for the United States Naval Base located there. PMSI removed two of the generators from the island and shipped them to our New Iberia, LA facility to completely refurbish the units.

PMSI overhauled the drivers and the generators. After overhaul the units were load-tested at the PMSI shop and then loaded and shipped back to the island for installation. PMSI currently provides all parts and technical service to this facility.

Engine-Generator Specifications:

Waukesha - L6670 DSI

Fuel:	Diesel
BHP:	1617
Speed:	1200 rpm
Fuel Consumption:	203,718 Btu/Min
Generator:	KATO, 1 MMW, 2400/4160 V, 3 phase
